

## Triple 6 ways of living

Six hundred and sixty six days of pondering  
More than a year of wondering  
To come to the simple conclusion  
That the invitation to life's inclusion  
Requires your first step for the wandering  
Action born from insight's solution

Six hundred and sixty six ways of living  
That opens even more petals in the giving  
As the cup fills with drops from the sun  
Empty as drained, becoming as become  
Quenched the thirst by the sipping  
Prudent the cautious, balance to some

Six hundred and sixty six, maze of meaning  
As the pure of heart might find healing  
In the embracing twists of life  
And reflect its change by its strife  
The mystery lived through the peeling  
Solace in the solar spice
